Formulation Development Intern

Humanwell Pharmaceuticals US, St Louis, MO

Interested candidate, please email your resume to: info@humanwellus.com.

Summary

Humanwell Pharmaceutical US, Inc. is a St Louis, MO-based pharmaceutical research and development company which focuses on discovery and development of novel therapeutics to address unmet medical needs. True to our name, we envision a world where all human beings are healthy and happy. Our mission is to bring innovative, safe, and effective therapies to patients and healthcare providers. We welcome talented people that share the same passion to join us.

Humanwell's internship program provides pharmaceutical science & engineering students the opportunities to work in various formulation development projects. The intern will work under senior product development scientists to develop oral and/or other dosage forms. Main activities include but are not limited to pre-formulation, formulation development, process development, literature search and other assigned work.

Job Responsibilities

- Perform hands-on pre-formulation, formulation, process, stability, and container closure development studies in the lab under the supervision of senior scientists.
- Independently plan and complete the assigned activities within the required timeframe assigned by supervisor.
- Operate and maintain various formulation equipment and testing instrument.
- Document the lab activities according to Good Documentation Practices.
- Summarize study results, prepare technical reports, and make presentations to peers and supervisors.
- Collaborate with cross-functional team members, including formulation scientist, analytical scientist, and project management.
- Follow pharmaceutical cGMP practices and other relevant regulatory guidelines.
- Assist on literature research and review if needed.
- Additional duties and assignments as needed.
- Follow all EHS and DEA compliance rules.

Requirements

- The ideal candidates are advanced Ph.D. students (rising 4th or 5th year) in Pharmaceutical Science, Chemical Engineering, Chemistry, or related disciplines
